

EDGE Instructional Opportunities

As an EDGE partner, your school or district has the opportunity to kick-start your physical education program with an instructional in-service with members of the Educational Disc Golf Experience team. The EDGE teaching team is comprised of PDGA professional disc golfers very knowledgeable to the game and teaching others. The EDGE team is available to provide a number of valuable services to your school or entire district in helping correctly train educators on equipment, safety, disc golf techniques and implementing the EDGE curriculum. We are also available for school demonstrations, half time shows and wellness fairs.

Whether for a half day, full day or week long camp, the EDGE team prides itself in providing the most accurate, detailed instruction so as to leave the school's instructors confident in the ability to teach disc golf to their students.

"The level of professionalism exhibited by Jay and Des (EDGE Instructors) went beyond all expectations. Before their travels to Spencer they did an outstanding job of communication to our staff on expectations of the day's events. They are not only outstanding in their field but they have a true understanding of how to help educators become very successful in the classroom with their students."

Bev Ahern

Physical Education Chair
Spencer, Iowa Community Schools

In-services can be customized to meet any needs your school or district has. For more information please contact:
